KARL J. DREHER  
Director

February 22, 2002 Department of Water Resources

Re: Submittal of Plans for Measuring Devices and Controlling Works Pursuant to the Idaho Department of Water Resources (IDWR) Order Dated October 11, 2001

Dear Water User,

One of the conditions of the Department's Order Requiring Measuring Devices and Controlling Works on Ground Water Diversions Discharging to the Timberdome Canal dated October 11, 2001 required water users to submit plans for installation of measuring devices and controlling works to IDWR by January 1, 2002. As of this date only two users have submitted any type of plans. Several other users have contacted the Department to discuss possible measuring device options. These users however have not submitted any written plans as requested by the order.

The purpose of this notice is to remind users who received the above order that the deadline for submittal of plans has passed. The Department will still accept plans that are submitted late. We encourage you to submit plans as soon as possible so that we can comment on the adequacy of any proposed installations. Please also be reminded that diversion of water from the wells discharging to the Timberdome Canal without installation of acceptable measuring devices and controlling works will result in the issuance of a formal Notice of Violation and possible civil penalties.

Please contact me directly at 327-7864 if you have additional questions or require further assistance regarding this matter.

Sincerely,

Tim Luke  
Water Allocations

Cc: Doug Rosenkrance, Watermaster  
IDWR Eastern Region

*Steven & I will install  
pipe orifices on the  
two wells we pump into the  
T.D. canal -*
